

# Fiber Optics

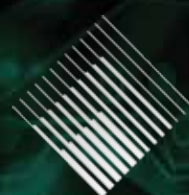

Fiber Optic cable is rapidly becoming an industry standard. Pillar Innovations is at the forefront of this movement, assisting the industry in adopting this new media. Pillar Innovation offers MSHA-approved cabling in bulk as well as custom-manufactured cable assemblies.

## Stock Materials

- 2,4,6,8 and 12 channel single and multinode cables
  - Hermaphroditic (genderless) and standard connectors
- Including:
- Delphi
  - Amphenol-FSI TFOCA II and TFOCA III
  - XP rated Gold Rush
  - SMC

Pillar Innovations is well-known for a commitment to service. Pillar technicians carry MSHA cards and are capable of performing on-site repairs and troubleshooting. Emergency response and 24-hour tech support are routinely offered to customers in need. Technicians are fully equipped with the tools and equipment necessary for fusion or mechanical splicing, testing, verifying and certifying fiber optic networks. By combining electrical control system expertise with the fiber optic realm, Pillar Innovations is a single source for all mine automation and communications network needs.
