

GFCI POWER DISTRIBUTION PANEL WITH ISOLATION TRANSFORMER

The GFCI Power Distribution Panel with Isolation Transformer offers isolation from old or worn GFCI's that are installed on power centers that are expensive to shut down for maintenance.

Simply plug this unit into a troublesome GFCI outlet and use the 4 single outlets on the front with no worries of tripping the existing GFCI on the power center. Each of the 4 outlets is protected by its own individual GFCI for easy troubleshooting.

- 2 kVa Isolation Transformer
- 4 Single Outlets with a total of 17 Amps available
- 20 Amp input
- GFCI Protection per each Outlet
- Outlets Protected from Water and Dust
- Filters Noisy AC Power
- 13"W x 21"H x 14"D
- 76 lbs.
